Risk Analysis matrix – level of risk

Likelihood	Consequences					Hierarchy of Risk Controls
	1 Insignificant	2 Minor	3 Moderate	4 Major	5 Catastrophic	
A Almost Certain						Elimination is a permanent solution and should be attempted in the first instance.
B Likely						Substitution involves replacing the hazard or environmental aspect by one of lower risk.
C Possible						Engineering controls involve physical barriers or structural changes to the environment or process.
D Unlikely				X		Administrative controls reduce hazard by altering procedures and providing instructions.
E Rare						Personal protective equipment last resort or temporary control.

Details of Action to be Taken

Actions: *(These should be determined by both the person(s) identifying the risk)*
When determining action refer to Hierarchy of Risk Control

Person assessing the risk: M.Bodsworth & S.McIntyre Date: 26th July 2009

Students who have been identified by their parents or Doctor as having a cold/flu or similar transmittable condition should not attend training until they are well and not contagious.

Any student that has a physical injury that causes them to be away from training while under clinical care of any type must have a clearance from that practitioner to allow them to train.

A student may return to training with restrictions to their training as agreed by the head instructor, the Doctor and if applicable the students parents and this will be set out in a modified training sheet.
